DIRECTIONS FOR USE

When used according to instructions no harmful residues will occur. Treated grain may be fed to humans and livestock 7 days after treatment.

Safe period to consume grain: 7 days after treatment.

Timing: For best results grain should be treated at the time of sowing and before any infestation. This should protect grain for up to 12 months.

Pre-treatment Hygiene: Before treatment clean the storage area thoroughly. Remove debris, grain, residues, and infested sacks and burn.

Method of Treatment: Place shelled grain on a clean surface, sprinkle Actellic® Gold Dust evenly over the grain and mix thoroughly using a shovel and return grain into bag or other storage container.

Compatibility: Actellic® Gold Dust should not be mixed with other pesticides.

Rate: 25 grams Actellic® Gold Dust (half fill the measuring cup) per 1 x 50 kg bag of grain, or 50 grams Actellic® Gold Dust (one full measuring cup) per 2 x 50 kg bags of grain, or 500 grams Actellic® Gold Dust per 1 tonne of grain.

WARRANTY:

All products supplied by Syngenta Crop Protection AG are to be used only in accordance with the recommendations and instructions given on the labels provided with this pack. Further, although it is believed that all products supplied by us are of high quality and are suitable, for the purposes indicated on the label, since we cannot exercise control over the everyday use of products, we do not give any warranty whatsoever as to their quality and fitness for purposes and we will not accept any responsibility whatsoever for damage arising from the storage, handling, application or use of our products.
