VS-04

Kiplant VS-04

is nutrient based with a total biodegradable chitosan, it is extracted through a biological processes which favours crop productivity and stimulates soil microorganism's activity. KIPLANT VS-04 increases root development and helps to strengthen the root, enabling the plant to defend itself against various pathogens such as nematodes, resulting in a stronger and healthy and more vigorous roots.

How Kiplant VS-04 helps the growth of the crops?

- ▶ Enhances the root structure and rejuvenates the soil.
- ▶ Strengthens the plant when confronted with stress.
- ▶ Zero Residue product.

Root development

Control

Kiplant VS-04

Why Kiplant VS-04 makes the difference?

Promoter and preventive effect

It's a physiological resistance inducer and growth promoter, it has preventive effect, reduces the negative impact on physiological stress situations.

Repair Effect

Promotes the root lignification's and allow the mechanical damaged roots suffering the attack by pathogen to rebuilt or be replaced by new growth, maintaining the capacity of the plants to be nurtured and exploring its production capacity.

APPLICATION PROCEDURE:

Dosage (L/ha)
3-5 L
5-10 L

Root application
Radicular repair action
Stress periods

Dosage (L-ha)
2.5 L

Foliar
Each 8-15 days
