

# Meet VICTRATO®<sup>™</sup>, the most powerful combination of nematode and disease control

<b>Description of active substance</b>	<ul style="list-style-type: none"> <li>• Composition: TYMIRIUM® technology</li> <li>• Formulated product: 500FS</li> </ul>
<b>What is the product?</b>	<p><b>VICTRATO® 500FS (TYMIRIUM® technology) is a step-change nematicide</b> with excellent activity against plant-parasitic nematodes and several fungal pathogens like Fusarium, Septoria, Erysiphe, Botrytis, and Sclerotinia.</p> <p>Based on its unique high-performing technology delivering powerful and flexible control, VICTRATO® 500FS (TYMIRIUM® technology) is pivotal in the nematode and disease management program.</p>
<b>Target growing systems</b>	<ul style="list-style-type: none"> <li>• <b>Soybean, Corn</b> (Cereals expected for 2024).</li> </ul>
<b>Pests</b>	<ul style="list-style-type: none"> <li>• <b>Nematode</b> <ul style="list-style-type: none"> <li>&gt;&gt; <b>Cyst nematodes:</b> VICTRATO® 500FS provides excellent control against cyst nematodes with great yield response.</li> <li>&gt;&gt; <b>Lesion nematodes:</b> VICTRATO® 500FS is highly active against lesion nematodes and showed considerable reduction of nematode penetration in the root system.</li> <li>&gt;&gt; <b>Root-knot nematodes:</b> VICTRATO® 500FS protects the roots against nematode penetration and galling, with strong performance against root-knot nematodes seen in all crops.</li> </ul> </li> <li>• <b>Fungal Soil and Foliar Diseases,</b> Like Fusarium Crown rot, Septoria, Erysiphe, Botrytis, and Sclerotinia.</li> </ul>

# VICTRATO<sup>®</sup> will deliver an unmatched return on investment

“powerful, new-generation seed-applied nematicide,  
safe and highly efficient at low rate,  
driving yield increase  
through healthier and stronger roots”

**Yield increase** observed in South Africa trials (2019 – 2022)

Up to **+ 30% on corn**

Up to **+20% on soy**

Performance confirmed by more than 4'000 trials globally
